

MODERN SEO — GEO AUDIT APPENDIX

External audit record for <https://firmsfinder.eu>

Document date: 14 October 2026, 08:28:55 EEST (timestamp of the original PDF; not a new audit timestamp).

Report prepared with: ChatGPT (OpenAI), as a conversational summary.

Document ID: MODSEO-GEO-20261014-01-EN

Status: PARTIAL — one preliminary audit available out of five requested. This document translates the earlier Romanian PDF. It does not perform a new technical verification or independently attest the website state. The exact time of the original audit was not recorded.

Audit 1 — Preliminary external GEO audit (14 October 2026)

Assessment: PARTIALLY VERIFIED. 13 checks: **6 PASS** · **1 FAIL** · **6 UNKNOWN**. No numerical GEO score assigned.

Check	Result
Homepage accessible	PASS
Page title and H1	PASS
H2/H3 structure	PASS
Business entity: AiVenture, CUI, CAEN	PASS
Official sources: ONRC and Ministry of Finance	PASS
Limitations and transparency	PASS
Internal links: some destinations not found in extracted navigation	FAIL*
robots.txt	UNKNOWN
sitemap.xml	UNKNOWN
/geo/	UNKNOWN
JSON-LD / Schema.org	UNKNOWN
intents.json	UNKNOWN
Complete GEO signals inventory	UNKNOWN

* FAIL reflects the observation reported in the preliminary audit; it does not prove that the URLs are missing or broken. UNKNOWN does not mean FAIL.

Verification priorities

P0: Check HTTP responses and content for robots.txt, sitemap.xml, llms.txt, intents.json and /geo/.

P1: Inventory ON-SITE and ON-PAGE signals and compare them with the deployed files.

P2: Run AI visibility tests using the same intents across multiple systems, retaining model-specific evidence.

Audits 2–5 — Not included

The other four original reports were not available in the material used for this document. No findings, timestamps or evidence have been fabricated. They can be added only after the original reports are supplied or recovered.

Provenance and integrity statement

This PDF was prepared using ChatGPT from the preliminary audit summary previously presented in the conversation. This attribution is **not** a cryptographic digital signature, an OpenAI-issued certificate, a qualified electronic signature or an independent verification of findings. The PDF SHA-256 hash is supplied in a separate file; embedding its own hash in the PDF would change the hash.

Primary source: ChatGPT conversation concerning the FirmsFinder.eu GEO audit, 14 October 2026. No HTTP logs, crawler exports, screenshots or runtime evidence are attached.
